One of those apps which had potential but the CEO and the team are utter useless. 1. It's been years since their app bugs still exist without any fixes. 2. No improvement in UI. 3. Utterly useless support without any real time updates or anything. 4. Your groups will be not be listed all of a sudden (one of the bugs they have no idea about so no resolution). It's just not worth it.

Subspace make very bad rule for the user once if you pay then you lose your money..if the subscriber doesn't allow you to login I am taking a subscription to Amazon prime now he logged out of me from the id and subscription doesn't refund the amount even now not responding to my text and call... so request all the users don't use this app before few years the rules are good but now a days they started not responding to user and forgot about refund that doesn't matter what is the issue...

I paid for a subscription through their app and they messaged saying that I'll get the subscription in a day and then 15 days later I still haven't gotten the subscription and they are not bothered to give their service. this is a fraudulent practice and should be reported.

Getting no response from the support team. Raised the issue multiple times. On the support team doesn't reply at all. Locked amount is not decreasing as it used to be decreased per day. From the last few days is constant.

An admin removed me from a group because I requested an OTP twice after Amazon logged me out automatically. After I rated that experience 1 star, I unexpectedly received several 1-star ratings and started getting removed from other newly joined groups as well. Even though the amount was refunded to my wallet, the situation felt unfair and biased. It seems that some admins prioritize protecting their RATING rather than handling issues in a fair and transparent way.

★☆☆☆☆ 2/8/26

Terrible Experience Useless Support, I stopped auto-renewal on expiry of subscription, but app still deduct money automatically. Several OTT plan names, their costs, and the number of screens are shown incorrectly, and these bugs have not been fixed. Customer support is the very worst part. They do not understand English and if you ask any question, they respond with something completely unrelated. This app is unreliable, Once you load money, you feel trapped since withdrawing funds is not easy.
